OBJECTIVE

I am passionate about building robust and scalable web applications that deliver exceptional user experiences. I am eager to contribute my skills to a dynamic team, tackle challenges, and grow.

PROJECTS

Musafir Traveller | Tourism Management Platform

[Live Site](#) | [Github](#)

A full-stack MERN application designed to connect tourists with local guides in Bangladesh.

Features:

- The platform offers three distinct user roles: Tourist, Tour Guide, and Admin with a tailored dashboard.
- A dynamic tour booking system is integrated with Stripe for secure and seamless payment processing.
- A dedicated community space allows users to share their travel stories and experiences with others.

Technologies: React, Tailwind CSS, DaisyUI, Node.js, Express.js, MongoDB, Firebase

Pathchakro | Online Group Study Platform

[Live Site](#) | [Github](#)

An online group-study platform for collaborative assignment creation, sharing, completion, and grading.

Features:

- Allows users to create, read, update, and delete assignments with role-based permissions and filtering.
- Enable submission of work via sharing links, a dedicated page for peer grading, and prevents self-grading.
- Provides Firebase Authentication with Email/Password and Google, along with JWT-based authorization.

Technologies: React, Tailwind CSS, TanStack Query, Node.js, Express.js, MongoDB

HomaRoom | Roommate Finder Platform

[Live Site](#) | [Github](#)

A platform designed to help individuals find compatible roommates and shared living spaces.

Features:

- Can create detailed listings for available rooms and browse existing listings with search and filter options.
- Users can express interest in a listing, and upon mutual interest ("like"), contact details are revealed.
- Secure user registration and login functionality, allowing users to create and manage their profiles.

Technologies: React, Tailwind CSS, DaisyUI, Node.js, Express.js, MongoDB, Firebase
